

The Background of ELINI

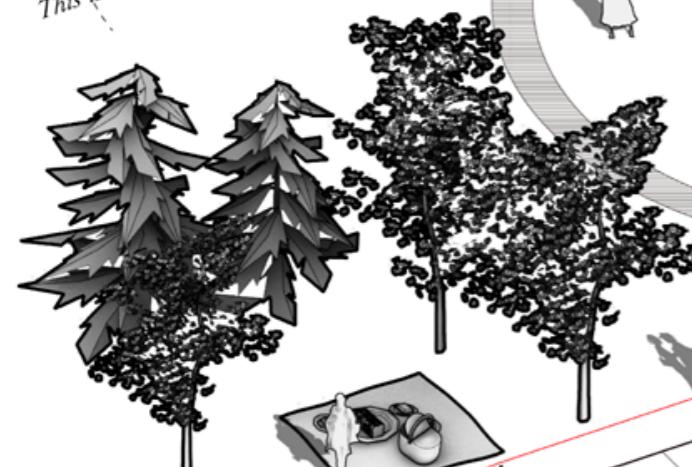

ACTIVITIES TIMELINE

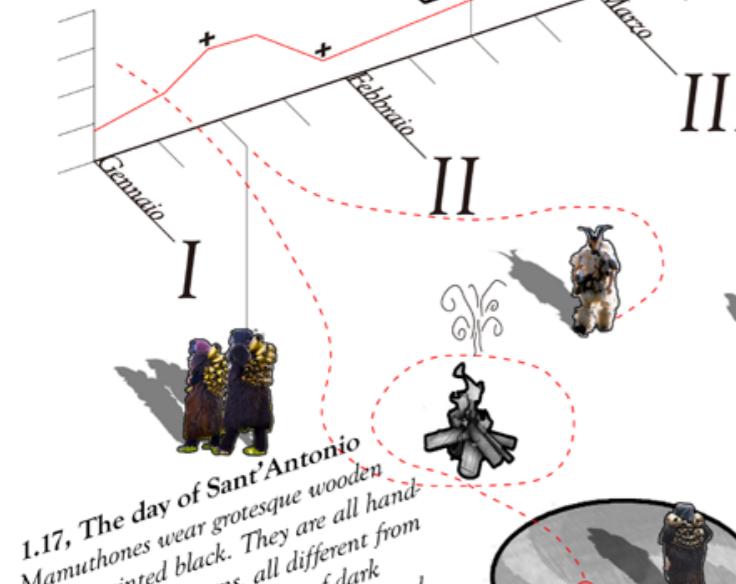

The residents of Elini and surrounding cities like camping in the Carmine park in different seasons. This is a good way to feel the beauty of nature.

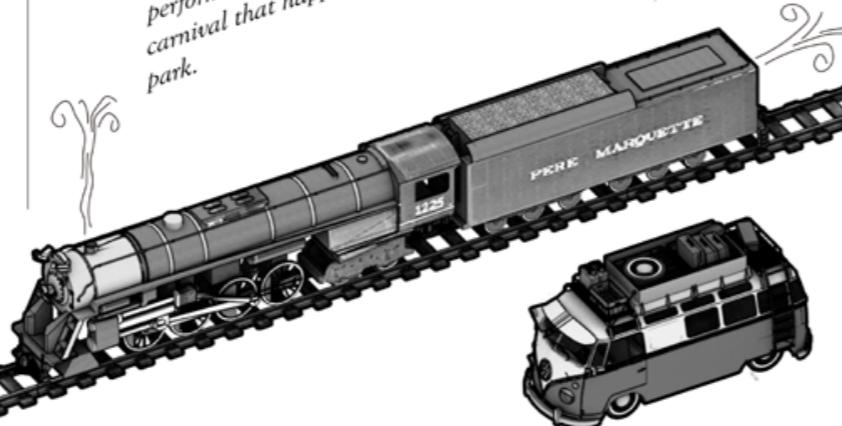

Church of San Gavino Martire

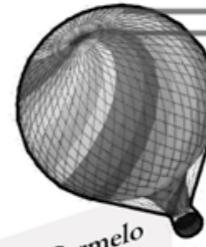

1.17. The day of Sant'Antonio Mamuthones wear grotesque wooden masks, painted black. They are all hand-made by local artisans, all different from one another. They wear vests of dark sheep fur and huge copper bells, arranged like tortoise shells on their backs.

When the folk parade starts, the town's main streets will be surrounded by large crowds. Then the street will become the main platform of folk performance. This form has a similarity with the carnival that happens in the big-scale amusement park.

3rd Saturday of July, Festa della Beata Vergine del Carmelo
The celebrations begin on Saturday, when the faithful depart, at the first light of dawn, from the church of the Virgin and of Saint Mauro. The statue of Our Lady is adorned with gold objects that the faithful have given to her over the years by grace received.

Granite railway station

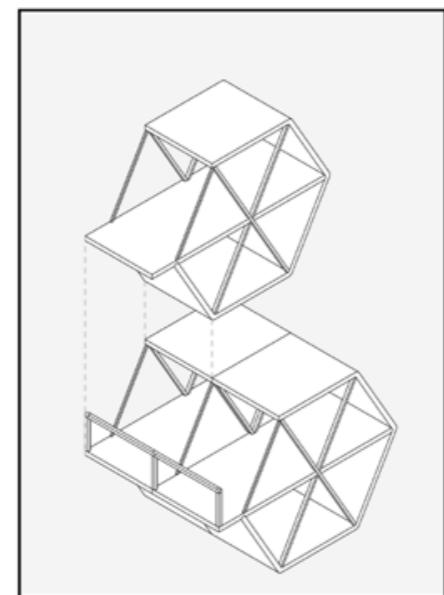

AREA C PLAN: EXTENSION OF ELINI RAIL STATION (HOTEL)

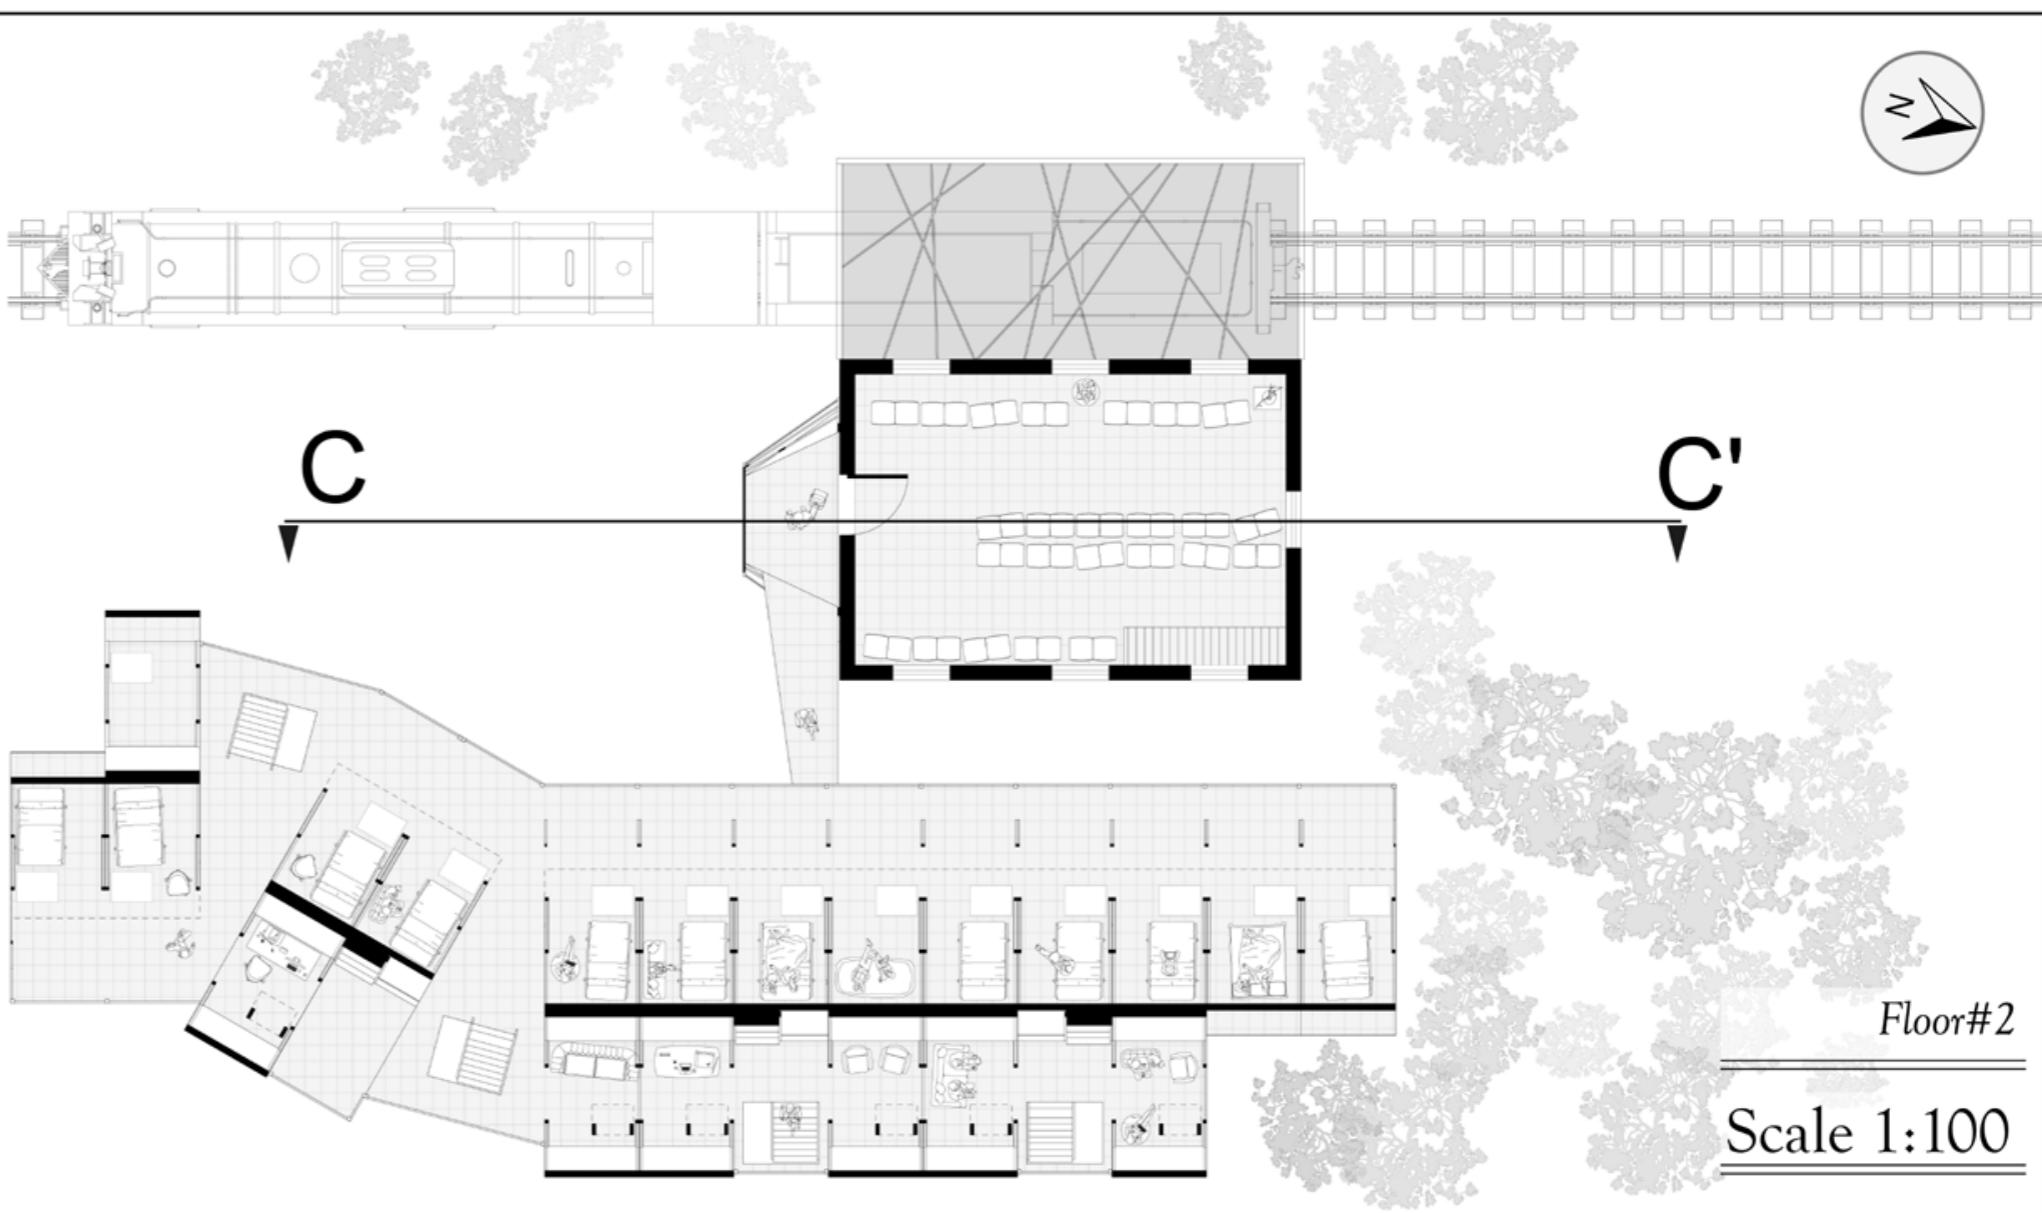

This is the extension of the old rail station in the center of Elini. The hotel's purpose is to attract more passengers and expand the functions of the original rail station. Because of the changing passenger flow volume throughout the year, the pre-fabrication technology of the hotel introduces great convenience and mobility into it. Each unit can form an independent hotel room and there are several methods to assemble separate units to make them become an entirety. A new cover consisted of steel and glass will be added to the original rail station, to create a restriction to the railway platform range.

AREA D PLAN: ART SCHOOL

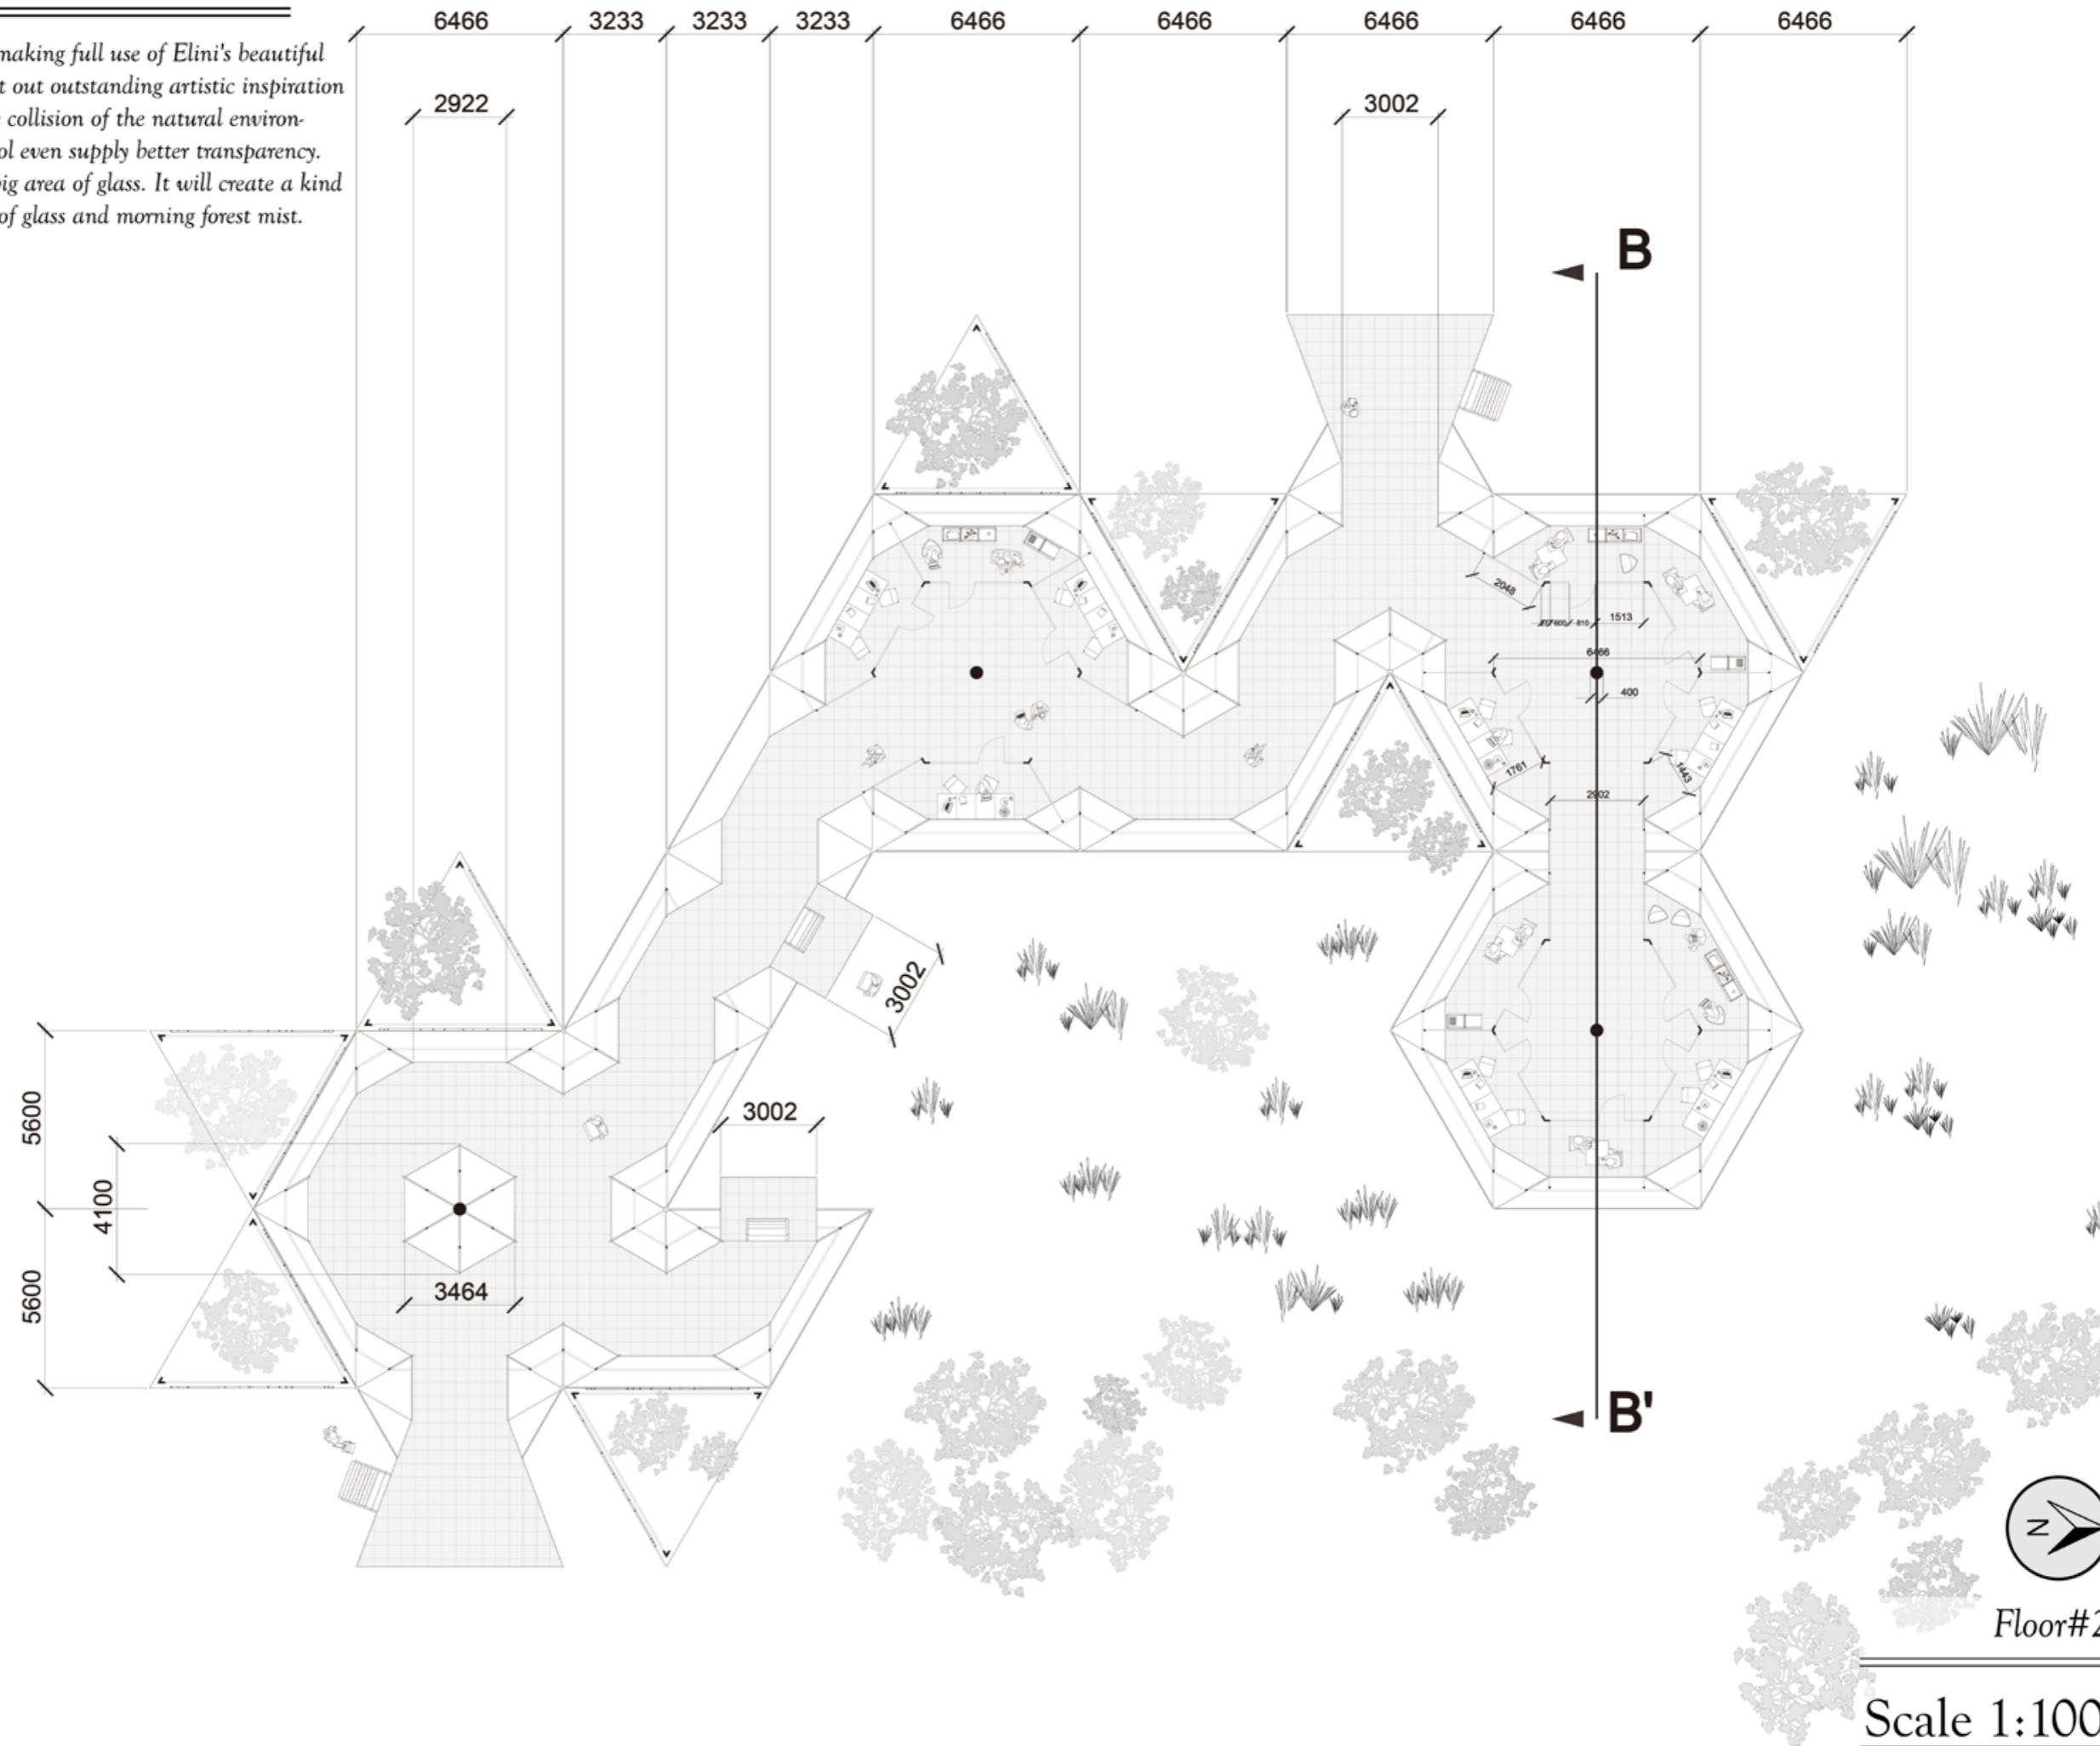

The site choice of art school is also in area D, making full use of Elini's beautiful natural environment, allowing students to burst out outstanding artistic inspiration under the influence of museum culture and the collision of the natural environment. Compare with the museum, the art school even supply better transparency. The whole building has a facade consists of a big area of glass. It will create a kind of hallucination with the fuse of the reflection of glass and morning forest mist.

AREA D PLAN: MUSEUM AND INDIVIDUAL STUDIO

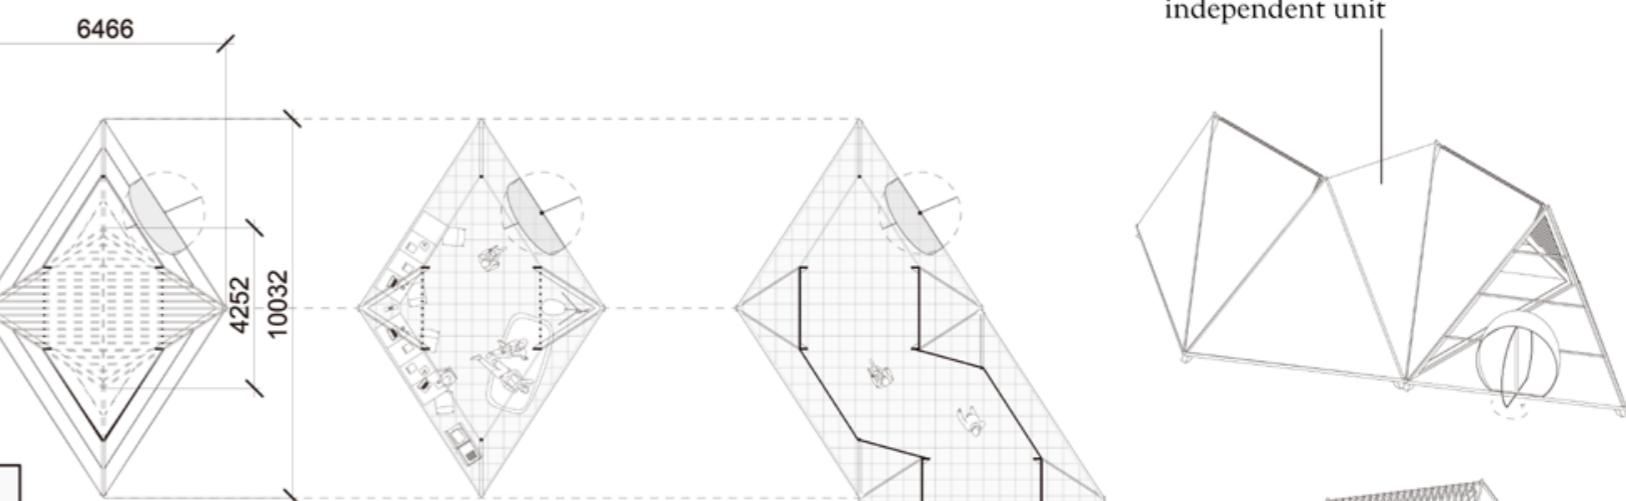

The museum is located in area D, which is the picturesque carmine park. To enhance the relationship between the natural landscape and people inside the building, the entire museum has good transparency. The shape of the museum comes from the common polygonal wooden forest trail on the soil and the concept of the facade comes from the wooden fence. The museum combined these two types: the shape of the road then rise up to create a long space as a gallery. Although the museum is a small-scale one, with the intermittent landscape and reflection of the glass and narrow corridor, it still brings a feeling of infinite space.
